## Trigonometric Functions

### Radian Measure

$$\frac{s}{r} = \frac{\theta}{1} = \theta \quad \text{or} \quad \theta = \frac{s}{r},$$

$$180^\circ = \pi \text{ radians.}$$

Degrees	Radians

The angles of two common triangles, in degrees and radians.

## SERIES

### Tests for Convergence of Infinite Series

- 1. The  $n$ th-Term Test:** Unless  $a_n \rightarrow 0$ , the series diverges.
- 2. Geometric series:**  $\sum ar^n$  converges if  $|r| < 1$ ; otherwise it diverges.
- 3.  $p$ -series:**  $\sum 1/n^p$  converges if  $p > 1$ ; otherwise it diverges.
- 4. Series with nonnegative terms:** Try the Integral Test, Ratio Test, or Root Test. Try comparing to a known series with the Comparison Test or the Limit Comparison Test.
- 5. Series with some negative terms:** Does  $\sum |a_n|$  converge? If yes, so does  $\sum a_n$  since absolute convergence implies convergence.
- 6. Alternating series:**  $\sum a_n$  converges if the series satisfies the conditions of the Alternating Series Test.
